CAREER OBJECTIVE

Final-year Computer Science (Data Science) student with hands-on experience in backend development and applied Machine Learning/NLP. Seeking a full-time opportunity to build production-grade systems and contribute to data-driven engineering teams.

EDUCATION

RNS Institute of Technology

B.E. in Computer Science (Data Science) — CGPA: 8.6

Bengaluru, India

Aug 2023 – Jul 2027

Sahyadri PU College

2nd PUC (PCMB) — 91.66%

Yadgir, India

Jul 2022 – Mar 2023

PROJECTS

Samvad — Voice-Based Stress Detection System

Major Project

- Built a full-stack voice-based stress detection system — FastAPI + PostgreSQL backend with JWT authentication, deployed on Render; trained and compared Logistic Regression, SVM, and Random Forest models, with explainability via feature-contribution breakdown.
- Developed a React Native (Expo) mobile app with live backend integration, packaged into an installable Android APK via EAS Build; resolved production issues including cold-start latency, DB connection pooling, and device-level recording bugs.
- Retrained model on a noise-augmented dataset (2,880 samples) to improve robustness to real-world microphone conditions.
- APK: [download link](#) · Repository: github.com/Chinmayi315/voice-stress-detector

Chandassu Analyzer — Kannada Poetic Meter (Prosody) Analysis System

Personal Project

- Built a full-stack Kannada prosody analyzer — FastAPI backend classifying syllables into Laghu (short) and Guru (long) using rule-based Unicode processing, with a live web interface for real-time analysis and Kanda Padya pattern verification.
- Designed and deployed the complete system to production, for a language with minimal existing computational tooling.
- Live demo: chandassu-analyzer.fastapicloud.dev · Repository: github.com/Chinmayi315/chandassu_analyzer

EXPERIENCE

AI Engineer Intern | Laneway

Bengaluru, India

May 2026 – August 2026

- Contributing to backend development for an AI-powered platform, working across API design, database logic, and system integration.
- Technologies used: Python, FastAPI, PostgreSQL.

Machine Learning Intern | Future Interns

Remote

Mar 2026 – Apr 2026

- Developed a sales prediction model with Linear Regression on historical datasets; evaluated performance via MAE and R² metrics.
- Built a text classification pipeline with TF-IDF vectorization and Logistic Regression, achieving ~85% accuracy.
- Designed a resume screening tool applying NLP and cosine similarity to rank candidates against job descriptions.

LEADERSHIP & ACHIEVEMENTS

Team Lead — Team Gagana

ISRO Bharatiya Antariksh Hackathon 2026

- Led team's Phase 1 submission (proposal and presentation) for generative AI-based cloud removal and reconstruction on LISS-IV satellite imagery; build phase contingent on Grand Finale shortlist.

SKILLS

Programming Languages: Python, C, SQL, Java

Core Concepts: Machine Learning, Data Structures & Algorithms, DBMS

Backend & Databases: FastAPI, PostgreSQL, SQL

Libraries & Tools: Pandas, NumPy, Scikit-learn, NLTK, TextBlob, Matplotlib

Dev Tools: Git, GitHub, Jupyter Notebook

CERTIFICATIONS

- Natural Language Processing — NPTEL, IIT Kharagpur (Elite Certificate), 2026
- Cloud Computing — NPTEL, 2025
